Postman Monthly Newsletter: November 2019

## Introducing Postman Visualizer

Have you ever wished API responses were more human-readable? Have you ever had to scroll through dozens of lines of JSON or XML to find what you needed? Have you ever wondered if there's a better way?

We did, and so we've created [Postman Visualizer](#).

Visualizer lets you render a custom view of the data returned from your APIs. You can turn complex API responses into beautiful, interactive visualizations, right within the Postman app, then easily share them with collaborators via Postman collections.

Want to get started off on the right foot? Check out the [Visualizer page](#) and join us for a [Visualizer webinar on November 21 at 9:30am PST](#).

[Learn More](#)

## Recent Releases

- [Visualizer](#): Make sense of complex API responses.
- [Public Profiles](#): Get credit for the work you've shared with the rest of the Postman community.
- [Team Discovery](#): Make onboarding easy and encourage collaboration by making your team public to fellow members of your organization.
- [Akamai EdgeGrid authentication](#): Utilize our in-app authorization helper.
- [API Creation](#): Create an API by importing a schema.

## Upcoming Events

- Our [Visualizer webinar](#) will be November 21st at 9:30am PST. Whether you're an API consumer or a developer, join in and learn how you can bring clarity to your API responses.
- AWS re:Invent is December 2-6th in Las Vegas! Meet the team and take a spin on the Postman slot machine for a chance to win our most tweeted about swag—our socks! AWS is giving the Postman community \$100 off tickets—just use code **RE19Spo** [when you register](#).

## Postman Blogs and Resources

Visualizing APIs of the world

Developer Advocate Kaustav Das Modak presents how our latest feature, [Visualizer](#), will help you filter out the noise and focus on what really matters: understanding your data.
