Experience

Lead Technical Writer | Heroku at Salesforce | Seattle, WA | August 2024 - May 2026

- **Led company-wide AI initiative**, including strategy, planning, creation, editing, and maintenance of technical and product documentation
- Wrote, edited, and managed **technical, API, and CLI reference docs** for managed inference and agents add-on beta and GA releases, 28 AI multimodal models, 5 AI integrations, AI apps, features like prompt caching and OpenAI compatibility
- Managed docs for major releases, including .NET language support, VSCode extension, and metered billing
- **Created CLI style guide** to improve clarity and consistency of **500+** command names, descriptions, argument and flag definitions, and examples
- Edited PRs by technical writers, engineers, and PMs for product releases
- Led outreach project to update and **confirm accuracy of 150+ pages** that had not been updated in 2+ years with PMs and language owners
- Collaborated with PMs, engineers, designers, program managers, language owners, customer support, and CX teammates
- Increased cross-functional collaboration and efficacy by creating feedback loops with AI engineering, product, and design teams

Senior Technical Writer | Postman | San Francisco, CA | May 2021 - Feb 2024

- Wrote and managed docs for **7 squads on a monthly release cycle**, covering new product features and improvements for security, identity, monitoring, implementation, configuration, API, CLI, administration, and billing
- Led projects focused on new content generation, **gap analysis**, readability, **style guide consistency**, and improving page and topic organization
- Increased cross-functional collaboration by creating feedback loops with product and dev relations
- Edited docs for product features, release notes, how-to guides, training content, developer outreach, and marketing campaigns by technical writers, developer evangelists, engineers, and PMs
- Collaborated with PMs, engineers, designers, and customer-facing teams
- **Mentored and onboarded** 5 technical writers onto the team

Technical Writer | Postman | San Francisco, CA | Sept 2019 - May 2021

- Wrote and managed docs for **7 squads on a biweekly release cycle**

- **Owned gap analysis** and resulting improvement tasks
- Formalized team's content contribution pipeline and processes and iterated on style guide
- Made docs contributions to improve readability, align content with style guide, and address gaps
- Edited PRs for fellow technical writers, evangelists, and engineers
- Created FAQs from 12 live webinar chat exports

Customer Success Manager | Postman | San Francisco, CA | March 2018 - September 2019

- Authored internal and external documentation, assisted with marketing materials
- Drafted and executed small to mid-scale customer outreach campaigns
- Provided end-to-end support, including **onboarding and product training**
- Communicated feature requests, enhancement opportunities, and bugs to product and engineering teams

Customer Success Specialist | Postman | San Francisco, CA | April 2017 - March 2018

- Provided technical support for a platform with several million active users
- **Created Help Center content** and iterated upon existing articles
- Identified, researched, and recreated reported issues; involved engineers only as necessary

Teacher | Girls Who Code Summer Program | San Ramon, CA | May - August 2016

- Led a class of **20 high school students** through the basics of Scratch, Python, HTML, CSS, and JavaScript
- Developed teaching materials and projects based on GWC curriculum

Education

Bachelor of Science | Ithaca College | May 2016

- Major in Communications, Audio Production; Minors in Computer Science, Web Programming
